

Kelwyn G. Mebane II

M.S. Computer Science Graduate Student

Public Trust Clearance | AWS Cloud Practitioner Certified

Mobile: 301.367.5212 | Email: tkmebane3@gmail.com | [GitHub](#) | [LinkedIn](#)

Education

B.S. Rehabilitation Science, George Mason University

Dec. 2020

M.S. Computer Science, Merrimack College

Dec. 2026

Skills & Certification

Certification: AWS Cloud Practitioner

Languages: Python, JavaScript, TypeScript, HTML, CSS, C++, SQL

Frameworks: React, FastAPI, SQLAlchemy, Pandas, NumPy, Jinja2

Tools: Visual Studio (VS) Code, GitHub, Git, Microsoft Software (Excel, Word)

Concepts: Debugging, automation, CRUD, OOP, data structures, AI, JSX/TSX, Agile

Soft skills: Problem solving, communication, attention to detail, analytical, adaptive

Projects

Netly - Python (FastAPI, SQLAlchemy, JinjaTemplates) | HTML | CSS

[VIEW CODE](#)

Full-stack web application to log, manage, persist, and query professional network connections.

- Designed backend routes using FastAPI and implemented CRUD operations with SQLAlchemy.
- Integrated JinjaTemplates for server-side rendering and dynamic page updates.
- Implemented form handling, request validation, and database session management.
- Designed a modular structure separating routes, models, and templates to improve maintainability.
- Continuously maintained and improved locally with version control managed through Git.

PandaPal - TypeScript/TSX (React) | Python (FastAPI, Pandas) | HTML | CSS [VIEW CODE](#)

In development full-stack data processing web application for transforming data with Pandas.

- Built a modern, component based frontend using React and TypeScript.
 - Implemented client-side file handling and state management for dynamic interaction.
 - Designed for future backend integration with FastAPI and Pandas.
 - Designed a modern UI with custom CSS styling.
 - Version control managed through Git.
-

Work Experience

Full-Stack Developer Intern, SkyIT

March 2026 – May 2026

- Improves developer and QA team understanding by analyzing and documenting frontend and backend architecture including API design, component structure, and configuration dependencies across the client application on Confluence.
- 100% completion of tasks prior to a given deadline tracked on Jira.
